THE TRUST *for* PUBLIC LAND  
LAND FOR PEOPLE

---

The Trust for Public Land conserves land for people to enjoy as parks, gardens, and other natural places, ensuring livable communities for generations to come.

Our Center for City Park Excellence helps make cities more successful through the renewal and creation of parks for their social, ecological, and economic benefits to residents and visitors alike.

# WHY CITY PARK FACTS?

Data is knowledge, and knowledge is power. Over the past decade, the city parks movement has gained tremendous power, and one reason is the dramatic increase in the amount of information available about almost every aspect of urban park and recreation systems.

We are pleased to present another edition of *City Park Facts*, an almanac of the parks and recreation systems of the 100 most populous cities. The 2015 edition presents the most data yet, including a snapshot of prominent urban park conservancies in big cities. As in 2014, we have adjusted our calculation of city land area to exclude unpopulated airport and railyard acreage, generating a more fair comparison between cities.

This year's *City Park Facts* also includes the percentage of residents within a half mile (10-minute walk) of a park for 10 additional cities, a metric generated by The Trust for Public Land's ParkScore analysis.

## HOW TO USE THIS BOOKLET

When we say "city," we mean only the municipality, not the metropolitan region. Thus, "Los Angeles" means the city of Los Angeles, not greater Los Angeles, nor Los Angeles County. However, several cities that are included in greater Los Angeles—Long Beach, Anaheim, Santa Ana, and Irvine—happen to be large enough to merit separate inclusion in this booklet and are listed under their own names.

When we say "park," we are referring to publicly owned and operated parks. In table 1, we count every kind of park within the municipal boundary of the city, including federal, state, county, regional, and municipal parks. We do not count private golf or other clubs, nor do we count parks in gated communities.

In most reports we combine the data from all the different park agencies in the city. In a few reports we separate parks by their management agency, sometimes omitting the various smaller, specialized agencies in a city.

When we say "operational spending" we mean year-in, year-out work such as landscape and tree maintenance, facility maintenance, trash removal, recreational programming, planning, administration, policing, lighting, marketing, etc. "Capital spending" refers to one-time items such as land acquisition, construction, and major road or structural repairs. In order to provide greater uniformity between agencies, we do not count the expenses associated with zoos, aquariums, professional sports stadiums, museums, and cemeteries, which exist in some cities' parks but not others'. In table 6, total spending includes both operational spending and capital spending.

For certain tables, we group cities by their average population density (population divided by municipal land area). We exclude airports, railyards, and parkland—the uninhabited portions of a city—from land area when calculating density; the four density categories are based on standard deviations from the mean.

The reports published here constitute only a portion of the data available from the Center for City Park Excellence. ## 5. PERCENT OF CITY POPULATION WITH WALKABLE PARK ACCESS

2014

*Park access is the ability to reach a publicly owned park within a half-mile walk on the road network, unobstructed by freeways, rivers, fences, and other obstacles. Thus far, park access has been measured only for the 60 most populous cities. For methodology, detailed analysis, and maps, visit [parkscore.org](http://parkscore.org).*

# SPENDING ON PARKS AND

# RECREATION PER RESIDENT BY CITY

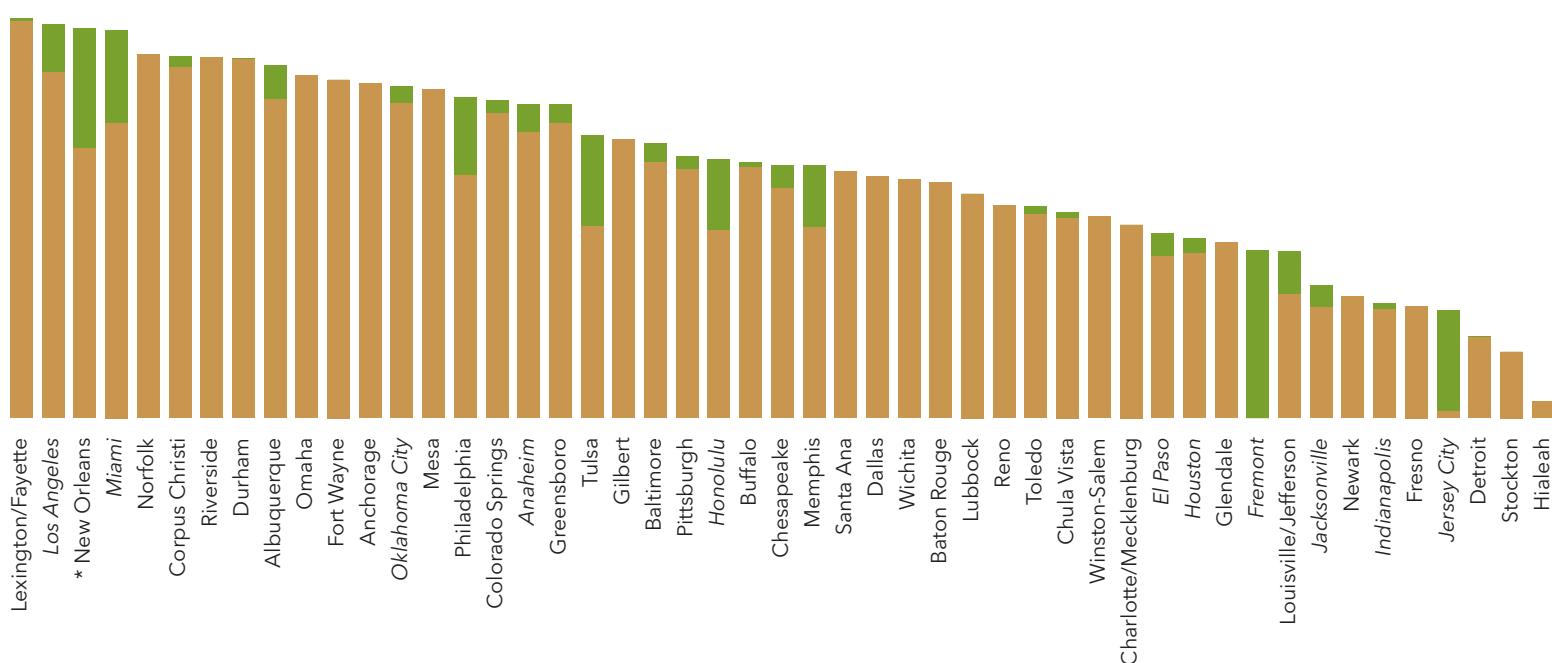

MOST RECENTLY REPORTED FISCAL YEAR

SPENDING BY PRIMARY PARK AGENCY       SPENDING BY ALL OTHER PARK AGENCIES

This chart depicts the relative share of spending by the city's primary park agency versus all other park-owning agencies within the city. The brown portion of each bar represents the spending of the city's primary park agency. The green portion represents the spending by the rest of the city's park-owning agencies.

Total spending includes both operating and capital spending of all park agencies in the city, but excludes professional stadiums, zoos, museums, aquariums, and cemeteries. If a city has more than one agency, expenditures are combined. Italics indicate cities whose spending is estimated based on past-year information. For a more detailed listing of fiscal year data by city, visit [tpl.org/cityparkfacts](http://tpl.org/cityparkfacts).

\*Boston, Cincinnati, New Orleans, and Washington, D.C., have two primary city park agencies.

## 10. DESIGNED AND NATURAL PARKLAND BY CITY

2014

 Designed areas are parklands that have been created, constructed, planted, and managed primarily for human use. They include playgrounds, neighborhood parks, sports fields, plazas, boulevards, municipal golf courses, municipal cemeteries, and all areas served by roadways, parking lots, and service buildings.

 Natural areas are either pristine or reclaimed lands that are left largely undisturbed and managed for their ecological value (i.e., wetlands, forests, deserts). While they may have trails and occasional benches, they are not developed for any recreation activities beyond walking, running, and cycling.
